BUyS Product Snapshot

Indicative Terms

Structure:

- **Index:** The S&P 500® Index (Bloomberg: SPX <Index>)
- **Maturity:** June 24, 2009 (18 Months)
- **Participation Rate:** 200%
- **Index Return Cap:** 7.50%-9.00% (to be determined on the Trade Date)
- **Buffer Level:** 10%

Positioning:

- Equity alternative that facilitates a moderately bullish view on the Index.
- 200% participation in the performance of the Index at maturity (no calls or averaging).

Best Case Scenario:

- If the Final Level is above the Initial Level, investors receive 200% of the performance of the Index at maturity, subject to an Index Return Cap of between 7.50% and 9.00% (to be determined on the Trade Date)
- An investment in the Securities is not callable or averaged.

Worst Case Scenario:

- Investment in the Securities is protected at maturity if the Index declines below the Initial Level by an amount less than or equal to the Buffer Level.
- If the Index declines below the Initial Level by more than the Buffer Level, an investment in the Securities will decline by 1% for every 1% decline in the Index below the Buffer Level of 10%.
- Maximum loss is 90% of the initial investment, subject to the credit of the Issuer.

Risk Considerations:

- Because the Securities do not offer full protection of your initial investment, and the return on the Securities is linked to the performance of the Index, you may lose up to 90% of your initial investment.
- Return on the Securities is linked to the value of the Index (without taking into consideration the value of dividends paid on the component stocks of the Index).
- An investment in the Securities is subject to the credit of the Issuer.

Investing in the Securities involves a number of risks. See "Selected Risk Factors" on the last page of this product snapshot, "Selected Risk Considerations" in the accompanying term sheet and "Risk Factors" in the accompanying product supplement.

Hypothetical Scenario Analysis at Maturity:

- Hypothetical scenario analysis contained herein does not reflect the reinvestment of dividends and does not reflect advisory fees, brokerage or other commissions, or any other expenses an investor may incur in connection with the Securities.
- No representation is made that any trading strategy or account will, or is likely to, achieve results similar to those shown. Hypothetical results are neither an indicator nor guarantee of future returns. Actual results will vary, perhaps materially, from the analysis below.
- The hypothetical scenarios assume an Index Return Cap of 8.25%.

Selected Risk Factors

- **YOUR INVESTMENT IN THE SECURITIES MAY RESULT IN A LOSS** — The Securities do not guarantee any return of your initial investment. The return on the Securities at maturity is linked to the performance of the S&P 500® Index (the “Index”) and will depend on whether, and the extent to which, the Index performance is positive or negative.
- **YOUR RETURN ON THE SECURITIES IS LIMITED BY THE INDEX RETURN CAP** — The Payment at Maturity will not exceed between 15%-18% (Index Return Cap multiplied by the Participation Rate) of your initial investment, regardless of the performance of the Index.
- **LIMITED PROTECTION AGAINST LOSS** — Payment at Maturity of the face amount of your Securities is protected against a decline in the Final Level, as compared to the Initial Level, of up to 10%. If the Final Level is less than the Initial Level by more than the Buffer Level of 10%, for every 1% decline beyond 10%, you will lose an amount equal to 1% of the face amount of your Securities. For example, an Index Return of -30% will result in a 20% loss of your initial investment.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE SECURITIES PRIOR TO MATURITY** — Certain built-in costs, such as our estimated cost of hedging, are likely to adversely affect the value of the Securities prior to maturity. You should be willing and able to hold your Securities to maturity.
- **NO COUPON OR DIVIDEND PAYMENTS OR VOTING RIGHTS** — You will not receive coupon payments on the Securities or have voting rights or rights to receive cash dividends or other distributions.
- **LACK OF LIQUIDITY** — There may be little or no secondary market for the Securities. The Securities will not be listed on any securities exchange.
- **OUR RESEARCH, OPINIONS OR RECOMMENDATIONS COULD AFFECT THE LEVEL OF THE INDEX OR THE MARKET VALUE OF THE SECURITIES** — We and our affiliates and agents may publish research, express opinions or provide recommendations that are inconsistent with investing in or holding the Securities, which could affect the level of the Index or the value of the Securities.
- **POTENTIAL CONFLICTS** — Because we and our affiliates play a variety of roles in connection with the issuance of the Securities, including acting as calculation agent and hedging our obligations under the Securities, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the Securities.
- **MANY ECONOMIC AND MARKET FACTORS WILL AFFECT THE VALUE OF THE SECURITIES** — In addition to the level of the Index on any day, the value of the Securities will be affected by a number of complex and interrelated economic and market factors that may either offset or magnify each other.
- **THE U.S. TAX CONSEQUENCES OF AN INVESTMENT IN THE SECURITIES ARE UNCLEAR** — Significant aspects of the U.S. federal income tax treatment of the Securities are uncertain, and no assurance can be given that the Internal Revenue Service will accept, or a court will uphold, the tax consequences described in term sheet No. 283UU related to this offering.
